PROFESSIONAL SUMMARY

Senior Mobile Software Engineer with 14+ years of software engineering experience, including 6+ years specializing in mobile application development. Extensive experience designing and delivering enterprise-scale mobile applications, beginning with native iOS development using Swift and evolving to cross-platform development with Flutter and Dart. Proven expertise in enterprise mobile application development, native iOS to Flutter migration, scalable architecture, payment gateway and digital wallet integrations, and third-party SDK implementation using Clean Architecture, GetX, RESTful APIs, and CI/CD best practices. Recognized for solving complex technical challenges, mentoring development teams, and delivering high-quality mobile applications that drive business value. Currently expanding expertise in ASP.NET Core and modern backend development to complement enterprise mobile engineering experience.

TECHNICAL SKILLS

Mobile Development: Flutter • UIKit • RxSwift

Programming Languages: Dart • Swift • C# • JavaScript

Architecture & Design Patterns: Clean Architecture • MVVM • MVC • SOLID Principles

State Management: GetX • RxSwift

Networking: RESTful APIs • Dio • Moya • Alamofire

Payment & Wallet Integrations: Apple Pay • Apple Wallet • Google Wallet • CheckoutCom • HyperPay • Mada • Tap Payments • Tamara • Tabby • Quara Finance

Analytics: Firebase Analytics (GA4) • Firebase Crashlytics • Adjust • Insider • Journify • Instabug

Third-Party SDKs & Services: Firebase • Constructor Search • Google Maps

CI/CD: Fastlane

Development Tools: Git • GitHub • Bitbucket • SourceTree • Xcode • Android Studio • Visual Studio Code • Visual Studio • App Store Connect • TestFlight

CAREER HIGHLIGHTS

- 14+ years of professional software engineering experience, including 6+ years specializing in enterprise mobile application development.
- Successfully contributed to the migration of a large-scale enterprise retail application from native iOS to Flutter.
- Designed, developed, and delivered enterprise-grade mobile applications serving customers across Saudi Arabia, United Arab Emirates, Kuwait, Bahrain, and Qatar.
- Built Flutter applications from scratch, taking full ownership from architecture and development to production-ready implementation.

- Integrated multiple payment gateways, digital wallets, analytics platforms, and third-party SDKs to deliver secure and scalable mobile solutions.
- Led technical initiatives, mentored developers, and collaborated with cross-functional Agile teams to deliver high-quality software.
- Specialized in Clean Architecture, CI/CD automation, performance optimization, and enterprise mobile application development.

PROFESSIONAL EXPERIENCE

Flutter Developer | [Jarir Bookstore](#) | Sep 2024 – Present

- Contributed to the migration of the Jarir Bookstore mobile application from native iOS to Flutter, helping modernize one of the region's leading retail applications while ensuring feature parity and a seamless user experience.
- Design and develop scalable, reusable Flutter components using Clean Architecture, GetX, and modern Flutter development best practices to improve maintainability and code quality.
- Develop production-ready features and integrate complex RESTful APIs, implementing business-critical functionality across multiple application modules.
- Lead the implementation of advanced mobile features, delivering seamless customer experiences and supporting evolving business requirements.
- Implement advanced search experiences by integrating Constructor Search APIs, handling complex filtering logic, dynamic product retrieval, and scalable state management.
- Optimize application performance by improving state management, reducing unnecessary widget rebuilds, and implementing efficient local persistence strategies for complex shopping cart workflows.
- Leverage extensive knowledge of the previous native iOS implementation to ensure business logic consistency, accelerate feature delivery, and support the successful migration to Flutter.
- Collaborated with product managers, designers, backend engineers, and QA teams in an Agile environment using Git-based workflows, code reviews, and pull requests to deliver high-quality production features.
- Troubleshoot and resolved complex production issues, contributing to application stability, performance, and maintainability.

Technologies: Flutter • Dart • GetX • Clean Architecture • REST APIs • Firebase Analytics • Firebase Crashlytics • Apple Wallet • Google Wallet • Constructor Search • Git

Flutter Developer | BLINK for Worker (Flutter | Private Enterprise Application)

Freelance Project | 2025

- Sole Flutter developer responsible for designing, developing, and delivering the BLINK for Worker application from scratch, supporting field workers in managing on-demand home car wash services.
- Implemented a scalable, production-ready application architecture using Flutter and Dart, with a strong focus on maintainability and performance.
- Built responsive and reusable UI components that delivered a consistent and intuitive user experience across Android and iOS devices.
- Ensured high code quality through clean architecture principles, continuous testing, debugging, and performance optimization.

Technologies: Flutter • Dart • GetX • REST APIs

Senior iOS Developer | [Aqwas](#) | 2020–2024
[Jarir Bookstore](#) (iOS) (Saudi Arabia)

- Played a key role in rebuilding the Jarir Bookstore iOS application from the ground up, delivering a scalable and high-performance enterprise mobile application under aggressive delivery timelines.
- Designed and developed core business modules, including Home, CMS, Product Details (PDP), Search, Cart, Checkout, Authentication, Customer Profile, and Loyalty, ensuring a seamless shopping experience.
- Integrated multiple payment solutions, including Apple Pay, Checkout.com, HyperPay, Mada, Tap Payments, Tamara, Tabby, and Quara Finance, providing secure and reliable checkout experiences across multiple markets.
- Implemented multi-country support for Saudi Arabia, United Arab Emirates, Kuwait, Bahrain, and Qatar, enabling localized content, pricing, and payment experiences.
- Automated build, code signing, and release workflows using Fastlane, improving deployment efficiency and streamlining the App Store release process.
- Integrated third-party SDKs and services, including Firebase Crashlytics, Instabug, Insider, Adjust, Journify, and Google Maps, enhancing application monitoring, analytics, customer engagement, and location-based features.
- Improved application performance and responsiveness by leveraging Swift Concurrency, asynchronous programming, and memory optimization techniques.
- Collaborated closely with product managers, designers, backend engineers, and QA teams to deliver high-quality features while maintaining application stability and code quality.

Technologies: Swift • UIKit • Swift Concurrency • Fastlane • Moya • Alamofire • REST APIs • Firebase Crashlytics • Google Maps • Apple Pay

Anat – [Lean](#) (Saudi Arabia)

- Contributed to migrating the application from a traditional Swift architecture to RxSwift, improving code maintainability, scalability, and application responsiveness.
- Performed extensive debugging, code refactoring, and performance optimization to enhance application stability, responsiveness, and overall reliability.
- Collaborated closely with product managers, designers, backend developers, and QA engineers to deliver high-quality features in an Agile development environment.

Technologies: Swift • RxSwift • REST APIs

Junior iOS Developer | [PentaValue](#) | 2018–2020
Avocato – Lawyer Request & Task Management

- Developed the application using Swift, building a robust platform that enabled users to request legal services and manage lawyer-related tasks.
- Integrated RESTful APIs using Alamofire, JSON parsing, and CocoaPods to build scalable application features.
- Collaborated with designers and backend developers to deliver reliable, user-focused mobile solutions.

Technologies: Swift • Alamofire • CocoaPods • REST APIs • JSON

Raka'a – Prayer Instruction App

- Developed the application from the ground up using Swift, integrating RESTful APIs, Alamofire, and Kingfisher.
- Worked closely with the development team to deliver a reliable and intuitive user experience.

Technologies: Swift • Alamofire • Kingfisher • REST APIs

Senior Software Engineer (.NET Team Lead) | [Suez Canal for Insurance](#) | 2012 – 2018

- Played a key role in migrating applications from AS/400 platform to Windows-based solutions.
- Designed and developed enterprise applications from scratch for multiple business departments, including Human Resources, Finance, and Stock Management.
- Built scalable web applications and internal systems using C#, ASP.NET, SQL Server, and Crystal Reports.
- Led a team of five software developers, providing technical leadership, task planning, code reviews, and mentoring throughout the software development lifecycle.

Technologies: C# • ASP.NET • SQL Server • Crystal Reports • Windows Forms

Junior .NET Developer | Comsys | 2011 – 2012

- Developed and enhanced web applications using ASP.NET, C#, SQL Server, HTML, CSS, JavaScript, and VB.NET.

Technologies: ASP.NET • C# • SQL Server • HTML • CSS • JavaScript • VB.NET

EDUCATION

Bachelor of Computer and Information Science
Ain Shams University
2010

LANGUAGES

- Arabic — Native
- English — Professional Working Proficiency
